

The Art Of Splendour

PREMIUM INTERIOR DESIGN FIRM **THE PLUSH** APPROACHES EVERY PROJECT LIKE A WORK OF ART, CREATING HOMES THAT ARE MORE THAN JUST PICTURE-PERFECT

STEP INTO A HOME DESIGNED BY INTERIOR DESIGN firm The Plush, and the difference is immediately palpable: whether the design style is elaborately classical or clean and modern, the space will be distinguished by a plethora of well-considered details and a harmonious sense of balance.

It's an achievement made possible by the firm's guiding philosophy to treat every interior design project as a piece of art. Helmed by design director Evelina Hu, the firm works to accomplish a fine balance between aesthetic qualities such as balance and proportion, and functionality.

Feat Of Excellence

The Plush has an impressive portfolio encompassing exclusive residential and commercial projects here and in places such as Taiwan, Hong Kong, Malaysia, Indonesia, Thailand, the Philippines and Shanghai.

A prime showcase of the team's thoughtful approach to design is this double-storey penthouse condominium in Millennium Residence in Bangkok. The homeowner's brief for the design of this eight-room unit provided the firm with a clear direction. Says Hu, "The owner wanted something that was nice and elegant, and gave us free rein aside from highlighting their specific spatial requirements, such as a spa room, an exercise room and a walk-in wardrobe with an electronic system."

Taking into account these requests and the project's cultural backdrop, Hu and her team focused on transforming the 7,000 sq ft space into a haven of contemporary style with traditional accents. As with many artistic endeavours, Hu wanted to tell a story through her work. She explains, "The Fountain of Youth is a legendary spring that reputedly restores the youth of anyone who drinks or bathes in its waters. The inspiration behind this project was the ever so elegant lady whose youth freezes even when time flies."

An Artistic Vision

Many details within the home evoke this muse. In the living room, for instance, customised lighting makes a remarkable style statement. Set against a rippling, stainless steel ceiling designed to resemble water, the "cage"-like light fixture features glass sculptures of birds, brought together to paint an abstract picture of birds flying out of their cage and the water. This motif is echoed in a wall light accented by glass bird sculptures.

Below the light, the striking S-shaped sofa taking centre stage in the living room was inspired by swans. It was the perfect piece to accentuate the smooth and curving structure of the home, says Hu, adding, "We can't think of anything that moves more gracefully than a swan."

To accentuate the ceiling's significant seven-metre height, Hu and her team created an imposing television console featuring a criss-cross design inspired by "the back design of a lady's gown", and completed it with high-gloss spray paint and a mirrored surface.

Flair For Details

No less attention was paid to each of the other rooms. Exuding a sense of tradition and serenity, the spa room features a wood-clad ceiling and quaint decorative details. In the powder room, customised floral tiles and onyx accents create a fashionably elegant atmosphere. Each of the four guest rooms in the home were also given an individual theme and furnished accordingly.

The results are a stunning display of the team's dedication to their craft, and their flair for creating impeccably elegant living spaces with distinctive identities. Little wonder, then, that more than 95 per cent of their clients are referrals from previous clients. Visit The Plush to better understand how Hu and her team can create a visually stunning home that meets your needs.
